THIS IS STOLEN

Our brand was born from two Kiwis sick of their day jobs, a need to escape and the love of a good time.

Stolen is a family of spirits sharing the same essential DNA: high quality, distinctive and unconventional character.

We believe that a good drink doesn't have to be complicated to order, or take forever to make.

We are challenging what a good drink should be.

Get on our level. It's fun here.

THIS IS STOLEN: CONSUMER

Stolen's target consumers are down for the fun. As professional 21- to 34-year-olds, they are smart, confident, adventurous, open-minded and spontaneous.

They know the secret to life is having fun, and are the first one at the bar to buy a round.

With a strong sense of what they like and a pulse on the latest trends, our target can tell the difference between a genuinely good time and a "for the 'Gram" scene.

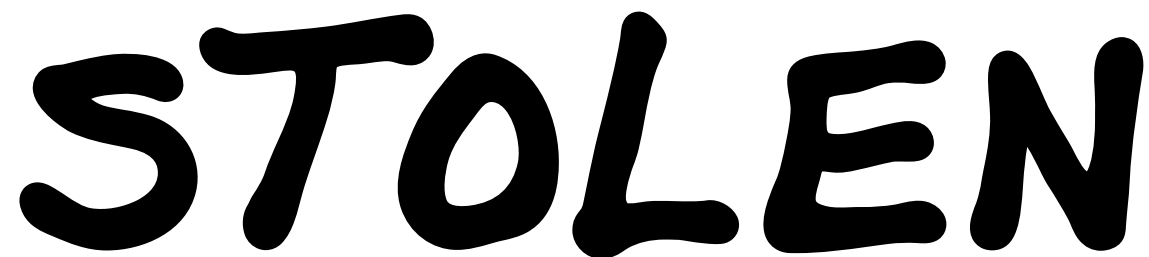

They're hilarious, but never take cheap shots. They're not intimidating because they don't act "too cool" for anything. After all, what's the fun in that?

LOGO: STOLEN

DO NOT distort, treat or use the logo in any color but black or white.

Primary Black

The word "STOLEN" is rendered in a bold, black, hand-drawn style font. The letters are thick and have irregular, slightly rounded edges, giving it a casual, graffiti-like appearance.

Primary Reversed

The word "STOLEN" is rendered in a bold, white, hand-drawn style font, set against a solid black rectangular background. The letters maintain the same thick, irregular, rounded characteristics as the primary black version.

LOGO & LOCKUPS: STOLEN X

'STOLEN X' rendered in StolenHand is to be used only in the approved logo lock-ups. Stolen X logo can be used in place of overarching Stolen logo on all Stolen X launch events and events where X is featured or is the only product.

1) Stacked Logo - the primary logo that is used on the bottle. Used whenever the space allows.

2) Horizontal Logo - used when available space dictates a wider logo.

TYPOGRAPHY

STOLENHAND

StolenHand is a custom MODIFIED typeface that isn't available for public use. **This font is only to be used on preapproved templates and as the provided lockups and logos.**

LESTER TWO

LESTER TWO is inspired by hand painted vernacular signage. It is clunky, lo-fi with a hint of deadpan charm.

This is a custom-designed typeface for Stolen use. Great for headlines, titles and headers, but can also be used at smaller sizes at the discretion of the designer.

PITCH

PITCH can be used for sub headers, body text, captions, and details. As a monospace typeface, the word spacing is large by default. This sometimes results in 'rivers' of negative space through longer instances of body text. For best results, please adjust JUSTIFICATION settings to 60% in the paragraph window.

While it comes in three different variations, in most cases we use only regular and bold (not italic).
